DETAILED ACTION

1. Applicants' response to the office action filed on June 17, 2004 has been entered and considered.
2. The instant application is filed on June 23, 2000, which claims priority to provisional applications 60/141,323 filed on June 25, 1999 and 60/176,880 filed on January 18, 2000.
3. Claims 79-126 are pending.

Response to arguments

4. Applicants' arguments are fully considered and found not persuasive.
5. The following is the rejection made in the previous office action under 35 USC 102 (b):

Claims 80, 85, 86,99-102, 104-105, 121, 126-127 are rejected under 35 U.S.C. 102(b) as being anticipated by Bowcock et al. (WO 98/12327) ('327).

The following rejection is based on the variant at position 2050 of SEQ ID No. 5, which is identical with alanine at position 421 of SEQ ID No. 52 of '327.

Bowcock et al. teach an isolated polypeptide according to claims 80, 85-86, 99 and 127 comprising a contiguous span of 10 amino acids said contiguous span of amino acids comprises an alanine at position 2050 of SEQ ID No. 5 (see pages 287-288, 348, SEQ ID NO. 52, and sequence alignment, the alanine at position 2050 of SEQ ID No. 5 corresponds to alanine of SEQ ID No. 52 of '327 at position 421).

With regard to claims 100-102, Bowcock et al. also teach that the polypeptide comprises at least 100 amino acids in length (see pages 287-288, SEQ ID NO. 52).

Art Unit: 1637

With regard to claim claims 104-105, Bowcock et al. teach that the polypeptide is a recombinant polypeptide and the composition comprising polypeptide further comprises a physiologically acceptable carrier (see page 129, lines 8-22);

With regard to claims 121, and 126, Bowcock et al teach an antibody that selectively binds to the polypeptide, which comprises an epitope-containing fragment comprising alanine at position 2050 of SEQ ID No. 5 (see page 104, lines 4-30). Thus the disclosure of Bowcock et al. meets the limitations in the instant claims.

Response to arguments

With regard to the above rejection Applicants' arguments and amendment are fully considered and are found not persuasive. Applicants argue that Bowcock et al. does not teach an isolated and recombinant polypeptide comprising a contiguous span of at least 10 amino acids or at least 40 amino acids or at least 100 amino acids that contain alanine at an amino acid position corresponding to position 2050 of SEQ ID No. 5. Applicants' arguments are fully considered and found not persuasive. Bowcock et al. does teach alanine amino acid at position 2050 of SEQ ID No. 5. (see the sequence alignment) and the sequence of Bowcock comprises contiguous sequences comprising at least 10 or 40 or 100 amino acids. Thus the disclosure of Bowcock et al. does anticipate the limitations in the instant claims.

Conclusion

Claims are 79, 81-84, 87-98, 103, 106-120, 122-125 are free of art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
